(a) Net grid cost by training seed
10 of 10 seeds below the RBC
Net grid cost (US$ per year)
Training seed
RL mean $229, 95% CI
RBC $616
RL, one seed
(b) Outcomes, RL relative to RBC
Also favoring the RBC: grid import during DR events (RL 1.75 vs RBC 0.08 kWh, $1.93 per year). Loss of load reverses over 100 event schedules (Fig. 4).
Export revenue
Loss of load
Peak grid import
HP-TES electricity
Battery wear
Discomfort
Grid import energy
Import cost
HP-TES electricity, summer peak hours
